

Concrete Props Pack Info Document

Features:

- **14 Modular Concrete Models:**
 - Designed for flexibility and ease of use in building detailed scenes.
 - Includes **pipes, walls, slabs, and modular concrete structures** suitable for industrial, urban, and construction environments.
 - **Optimized Geometry:**
 - Total Vertices: **2712**
 - Total Polygons: **2686**
 - Minimum Vertices: **24**, Maximum Vertices: **1056**
 - Includes **2 LOD (Level of Detail)** models for enhanced performance.
 - **High-Quality Textures:**
 - **5 PBR Texture Sets**, each containing **Diffuse, Normal, Metallic, and Roughness** maps.
 - Textures provided at a resolution of **2048x2048** for high detail.
 - **Material Setup:**
 - **4 Materials** configured for seamless integration into your projects.
-

Compatibility:

Render Pipelines:

- **Built-In**
 - **URP (Universal Render Pipeline)**
 - **HDRP (High Definition Render Pipeline)**
-

How to Use with Your Desired Render Pipeline:

1. Navigate to the **Assets > SATProductions > Concrete Pack** folder.
 2. Import the appropriate package for your pipeline:
 - **Concrete Pack Built-In** for the Built-In Render Pipeline.
 - **Concrete Pack URP** for Universal Render Pipeline.
 - **Concrete Pack HDRP** for High Definition Render Pipeline.
-

Ideal For:

- **Urban Scenes:** Realistic settings like streets, parks, or industrial zones.
- **Construction Sites:** Adding life to work-in-progress environments.
- **Industrial Areas:** Pipes and modular components for warehouses or factories.

Why Choose the Concrete Props Pack?

This pack is crafted to offer developers highly modular and performance-optimized assets. Its versatility makes it suitable for various project types, from **simulation games** to **city-building projects**, enhancing the realism of any scene.
